

Pricing and Costing

Click on Stock Item > More > Pricing and Costing

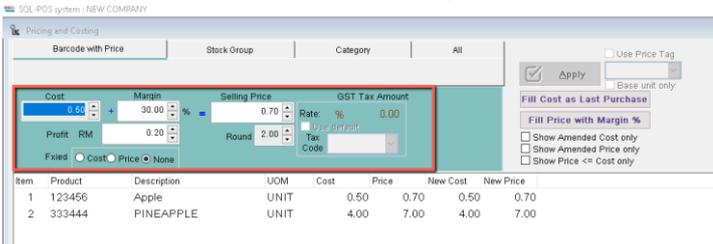

At this screen we can adjust the stock pricing with simple click

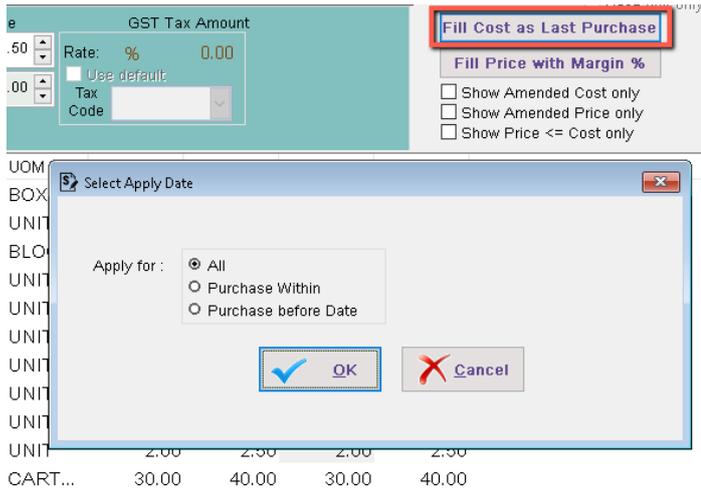

1. Barcode with price - To search the item with tick the barcode with price
2. Stock Group – Search item by stock group
3. Category – Search by category
4. All – Show all item codes

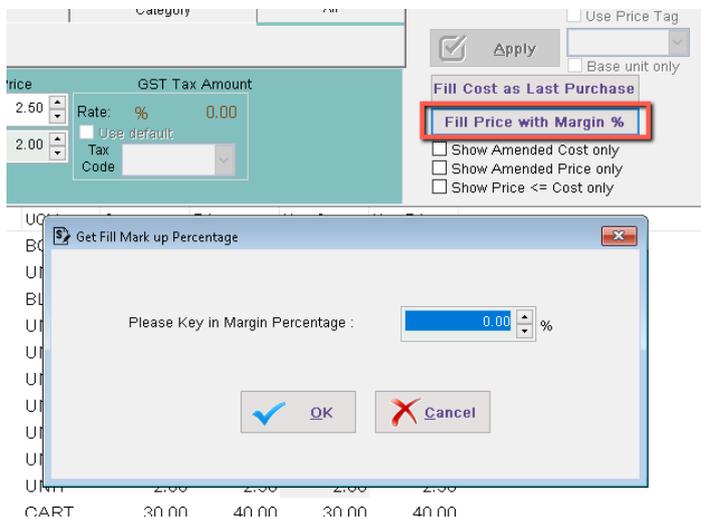

After apply the item code, at this screen you able to view for each item selected at below

Click the button Fill Cost as Last Purchase. You can update the cost based on purchase invoice, either based on ALL invoices (no date range) or Purchase Within the number of days you want or Purchase before the date.

Click the button Fill Price with Margin %, you can update the ref price based on the margin you want.

After complete the step, please click Update button to update it, and the cost/price will update in SQL Accounting too!
